Bradford Families,

At the high school level, teachers have set up Google Classrooms. All HS students were assigned email addresses with the domain address: @bradfordbulldog.com. This is the preferred way for teachers to communicate with students. Additionally, it is important that parent contact information is accurate in Powerschool. Please check your contact information so that you receive school messenger notifications that are sent via email and text message.

Because high school classes accrue credit, we are awaiting guidance from the Michigan Department of Education regarding this, especially as it relates to seniors and graduation. We will let you know as soon as we are able. Additionally, because we were unable to finish our exams, we are also determining how to provide grades for students that is equitable. As is true at the elementary, no school work during this time will be graded due to issues of equity--it is unfair to punish students who do not have the same kinds of access to the work as others.

Finally, please know that the learning process can take many forms--reading, engaging in challenging tasks like brain-teasers and some puzzles, and even kinesthetic activities like practicing a musical instrument or athletic training (at a social distance) are healthy learning activities for high school students. Cleaning the house may very well be a learning experience! Your students' teachers will provide you with these and other resources as we collaboratively negotiate our way through this shutdown. All learning opportunities provided by teachers are optional and will not be used for a grade.
